

## Infusion Services

Our State-of-the-art compounding rooms are designed to meet USP 797 and 800 standards

**Reliable. Compliant. Facility-Ready Infusion Support.**

*Our Infusion Services are designed to support hospitals and acute care providers with high-quality, infusion-ready sterile medications. We partner closely with clinical teams to ensure timely access, uncompromising safety, and seamless coordination across the continuum of care.*

### Infusion-Ready Sterile Preparations

- Ready-to-administer IV medications prepared to exact specifications
- Reduced bedside compounding and nursing burden
- Consistent dosing and preparation accuracy

### TPN & Parenteral Nutrition Support

- Customized Total Parenteral Nutrition (TPN) formulations
- Support for complex nutritional needs in acute and critical care
- Prepared under stringent sterility and stability standards

### Oncology & Specialty Infusions

- Specialized preparation for oncology and high-risk therapies
- Strict adherence to handling, safety, and compliance protocols
- Support for complex and time-sensitive treatment regimens

### Temperature-Controlled Handling & Delivery

- End-to-end cold chain management
- Monitored storage and transport to maintain medication integrity
- Reliable, on-time delivery to meet clinical schedules

### Clinical Coordination with Customers

- Direct collaboration with pharmacists, nurses, and care teams
- Streamlined communication for orders, changes, and scheduling
- Support for continuity of care and reduced therapy delays

**Quality & Compliance:**  
Prepared under rigorous regulatory and quality standards

**Operational Efficiency:**  
Reduces workload for hospital pharmacy and nursing staff

**Patient Safety:**  
Minimizes risk through standardized, sterile preparations

**Clinical Partnership:**  
A trusted extension of your care team
